How to Become a Video Game Designer

Job Description
Video Game Designers write and debug computer code to develop games for a variety of platforms. They determine the concept and design of the game, sketch and storyboard what the game will look like, and create a limited version of the audio and video of their game. Video Game Designers maintain flow charts of the activities and people involved in the design and development, and each version of the game is redesigned and tested until all the problems and flaws are eliminated.

Video Game Designing involves specialists who help create a video game. These include: Programmer, Writer, Audio Programmer, Level Designer, Animator, Modeler, License Support Engineer, and Software Engineer.

Work Environment
Video Game Designers work indoors in offices or rooms where specialized machines and tools are available, such as computers, graphics, and audio and sound equipment. Designing a video game takes a long time, and some programmers who work alone have a difficult time with the lengthy process. Overtime may be expected with very long hours necessary to meet deadlines. Typically, a person may work alone in an office or a home office, and interaction with people increases with advancement.

Career Outlook

Income
Income varies by type of employer, level of education, and geographic area. Job seekers with a graduate degree usually earn a higher entry-level salary than those with a Bachelor's Degree. A Computer Programmer's salary ranges from entry-level ($5,000/month) to experienced ($8,650/month). It is common for a recent graduate to work at a low paying position to gain experience and recognition in the field.

Education Requirements
Most employers prefer a job applicant to have a Bachelor's degree in Computer Science or Computer Engineering. One to two years of programming experience is essential. Individuals with a Master's Degree in Computer Science have a better job outlook. Employers prefer candidates to have experience in various programming languages. A love of video games is a plus.
