RE: Out-of-state online students

### Overview

An analysis was conducted to determine the number of out of state students enrolled in online courses at Foothill and De Anza Colleges during Fall 2010 and Winter 2011. As requested, the data was broken down by the residency indicator and their mailing address. Online courses were identified by selecting classes ending with a “W” or “Z.” There were about 8500-8600 students enrolled in one or more online courses during Fall and Winter terms. Note that these students could have also enrolled in an on-campus section as well.

### Highlights

- The majority of students who enroll in a District online course are In State Residents, composing roughly 90% of the total online enrollment for Fall 2010 and Winter 2011.
- In state Non-Residents make up close to 10% of total online enrollment for Fall 2010 and Winter 2011.
- Out of State Non-Resident students compose a small percentage of total online enrollment, less than 1% at De Anza and 1% at Foothill.
- There are almost 50 Out of State Non-Resident students who enrolled in a District online course during Fall 2010 or Winter 2011.

FHDA Online Course Enrollment										
Institution	Non-Resident				Resident				Total	
	In State Address		Out of State Address		In State Address		Out of State Address		Enrollment	% Row
	Enrollment	% Row	Enrollment	% Row	Enrollment	% Row	Enrollment	% Row		
2010 Fall De Anza	310	8%	11	0%	3374	92%	3	0%	3698	100%
2010 Fall Foothill	465	8%	36	1%	4555	91%	5	0%	5061	100%
2011 Winter De Anza	390	11%	8	0%	3239	89%	3	0%	3640	100%
2011 Winter Foothill	548	10%	37	1%	4313	89%	6	0%	4904	100%
