

Dear **Engineering / Nano Technology / Physics** Program Review Author:

Thank you for your time and effort in completing the Comprehensive Program Review this year. Your work contributes to the College's effort to seek ways to constantly improve on behalf of students.

Strengths

PRC notes that the physics program has excellent community outreach and both engineering and physics should be commended on their robust enrollment growth.

All three programs are working hard to help targeted student groups and they are experimenting with new curriculum.

Suggestions for Improvement

PRC is concerned that the enrollment for NANO has dropped over the last three years and that the program is serving a very small group of students and thus may not be viable.

Recommendation – **Green**

PRC recommends the Nano department complete a report showing of how NANO is funded and a plan for achieving increases in enrollment. Please submit this report to the PRC by October 15th 2015.

The program (Engineering / Nano Technology / Physics) is recommended to continue in the regular program review cycle.
