55-64 Years	3,418	17.5%	
65+ Years	1,345	6.9%	

Industries Employing Accounting Technology Occupations

A number of industries in Santa Clara and San Mateo Counties employ those trained in accounting technology and its related occupations. The following table represents a regional industry breakdown of the number of accounting technicians employed, the percentage of accounting technology jobs employed by industry and the percentage accounting technology jobs represent within all jobs by each industry. While certified public accountants employed 6.8% of all regional accounting technicians in 2013, accounting technology and its related occupations represent roughly over one-sixth of the total jobs in other accounting service (19.2%).

Inverse Staffing Patterns (Regional)

Top Five Industries	Occupation Group Jobs in Industry (2013)	% of Occupation Group in Industry (2013)	% of Total Jobs in Industry (2013)
Offices of Certified Public Accountants (541211)	1,330	6.8%	19.2%
Corporate, Subsidiary, and Regional Managing Offices (551114)	620	3.2%	4.3%
Local Government, Excluding Education and Hospitals (903999)	600	3.1%	1.6%
Office Administrative Services (561110)	588	3.0%	8.8%
Offices of Physicians (except Mental Health Specialists) (621111)	555	2.8%	4.0%

State Data Sources

This report uses state data from the following agencies: California Labor Market Information Department

Institution Data

The institution data in this report is taken directly from the national IPEDS database published by the U.S. Department of Education's National Center for Education Statistics.

Completers Data

The completers data in this report is taken directly from the national IPEDS database published by the U.S. Department of Education's National Center for Education Statistics.

Occupation Data

EMSI occupation employment data are based on final EMSI industry data and final EMSI staffing patterns. Wage estimates are based on Occupational Employment Statistics (QCEW and Non-QCEW Employees classes of worker) and the American Community Survey (Self-Employed and Extended Proprietors). Occupational wage estimates also affected by county-level EMSI earnings by industry.

Staffing Patterns Data

The staffing pattern data in this report are compiled from several sources using a specialized process. For QCEW and Non-QCEW Employees classes of worker, sources include Occupational Employment Statistics, the National Industry-Occupation Employment Matrix, and the American Community Survey. For the Self-Employed and Extended Proprietors classes of worker, the primary source is the American Community Survey, with a small amount of information from Occupational Employment Statistics.

Industry Data

EMSI industry data have various sources depending on the class of worker. (1) For QCEW Employees, EMSI primarily uses the QCEW (Quarterly Census of Employment and Wages), with supplemental estimates from County Business Patterns and Current Employment Statistics. (2) Non-QCEW employees data are based on a number of sources including QCEW, Current Employment Statistics, County Business Patterns, BEA State and Local Personal Income reports, the National Industry-Occupation Employment Matrix (NIOEM), the American Community Survey, and Railroad Retirement Board statistics. (3) Self-Employed and Extended Proprietor classes of worker data are primarily based on the American Community Survey, Nonemployer Statistics, and BEA State and Local Personal Income Reports. Projections for QCEW and Non-QCEW Employees are informed by NIOEM and long-term industry projections published by individual states.
