## Selected SLO Focus

SLO goes here

## Instructions

Identify where in your course you teach and assess the above SLO. After you evaluate your assessment, examine the results and answer the following questions:

1. How did you assess that students have met the student learning outcome?  
Please attach the assessment that you used (if it's not possible to attach, please discuss with me or Eric).
2. What percentage of your students were able to demonstrate proficiency?
3. What strengths did you find that students demonstrated in relation to the SLO?
4. Did you notice any patterns of misconceptions or difficulty meeting the SLO?
5. Are there groups of students who fared better or worse on the assessment? Can you make any hypothesis based on the assessment data about what may help students reach proficiency?
6. Does the data provide any insights that may help you rethink how you teach this portion of your class?
7. What actions might help students achieve proficiency?
8. What support do you need to continually improve teaching for this portion of your course?

## Submission

Type your reflections directly into the assignment, or upload a .doc with your reflections.
