

College Planning Documents: 2018-19 Status

Sustainability Plan Overview

Prepared by request for the Revenue & Resources Committee, April 2019

The Sustainability Management Plan was last revised April 19, 2018 and approved by the main college governance body. Reporting to the American Association of Sustainability (AASHE) and updating the Sustainability Report should occur every two years. AASHE is due now and the Sustainability Plan could be revised next year.

While this plan is not required for any particular body, having an outdated plan may be seen as a miss by taxpayers, accreditors, and AASHE. Note that the Sustainability Plan currently informs the Facilities Master Plan.

Bob Cormia, Jim Kozelka, and Julie Ceballos have been involved with the Sustainability Plan and could continue their engagement. Other participants are no longer as active or with the college.

Facilities Master Plan Overview

Prepared by request for the Revenue & Resources Committee, April 2019

The College Facilities Master Plan drives the District Facilities Master Plan, and both plans should be aligned. The College's Facilities Master Plan contains an introduction, analysis, and recommendations. The most current document is from 2016 and was produced by a consultant (Gensler).

The purpose statement states:

The purpose of the Facilities Master Plan is to provide a guide for future campus maintenance and renovation. The plan will describe how the College will be improved to meet the educational mission, serve the changing needs of our students and address the future requirements of the campus.
