Foothill College Workforce Presents

Spring Break 2020

# SPRINGTERRIPS

# OVERVIEW

Springternship is a way to bring internships to students on our college campus. Strategically running during Spring break, Springternship offers students a way to partake in real world experience through internships while eliminating barriers such as commute, and finding the internship. This one week intensive internship places students in hand selected internships at the Foothill Sunnyvale Center and offers college credit. No experience is necessary. Students are matched with Springternship organizations based on interest and area of study upon registering for ITRN 50.5 CRN 32301.

Taking a cohort based model, students are placed in teams with each community based organization and are introduced to the challenges by their mentor – a representative of the organization they are working with. In one week, students will not only work with their peers to solve a challenge, they will learn invaluable skills that will make them workplace ready such as personal branding, interview skills, and networking.
