**Subject:** Covid update

As many of you have heard or read, there is a new Covid variant, Omicron, so I want to assure everyone that our health office is monitoring the Santa Clara County health department's recommendations and protocols for us. In addition, you may want to see this latest news coverage which indicates that we are very safe in our county. However, as always, we will proceed judiciously and cautiously with all of our activities. At this point, the only county guideline is to mask when indoors and many of our activities are outdoors or behind plexiglass screens.
