

Extra Credit:

I read a very good book on how to study for math and science classes. I recommend trying to read it prior to the start of the quarter, or very early in the quarter.

“A Mind for Numbers” by Barbara Oakley

[http://www.amazon.com/Mind-Numbers-Science-Flunked-Algebra-ebook/dp/B00G3L19ZU/ref=sr\\_1\\_5?s=books&ie=UTF8&qid=1410836415&sr=1-5&keywords=how+to+study+mathematics](http://www.amazon.com/Mind-Numbers-Science-Flunked-Algebra-ebook/dp/B00G3L19ZU/ref=sr_1_5?s=books&ie=UTF8&qid=1410836415&sr=1-5&keywords=how+to+study+mathematics)

It can even be checked out for free from our Foothill Library. I will give 10 points of extra credit for a nice summary of the book. One half page summary of the hints and techniques outlined in the book and another one half page on how you plan to implement them and other things you will do to be successful in physics. Due by the second Tuesday of the quarter at midnight.
