

## Considerations for Senate Discussion:

- A) For two years in a row, we've only had one qualified applicant for the Basic Skills scholarship. Can we have specific instructions that we can combine the two awards into one if it happens in the future?
- B) For the scholarship that is intended for workforce, we had a large number of people who previously have gone to college who are coming back to retrain, in addition to people just getting started. We would like guidance on how to treat the re-entry population. Do we judge them differently from the other people?
- C) For the transfer scholarship: consider removing the language that gives preference to those who are able to participate in activities like student leadership?
