

SLI STEM Impact Team

School Year 2021-22

Anh Clerkin, alum

I'm Anh Clerkin, I go by Ann. I'm currently a Chemical Engineering student at SJSU, graduating from FH in 2020. I enjoy anything and everything space exploration, with the pipe dream of working for NASA on closed life-support systems for space voyages. I am a proud former Owl and I hope to make an impact on giving back to the FH community, which I hold very dearly.

Lana Devlikamova, alum

Lana is a Legal Operations Manager at CapitalG where she manages legal operations. Before CapitalG, Lana was a Corporate Paralegal at Wilson Sonsini Goodrich & Rosati, where she worked with medical device companies primarily on entity formations, private company financings, and corporate governance. Lana studied Communications at Foothill and then graduated with high honors from University of California, Berkeley with a BA in Media Studies.

Daisy Fragoso

Daisy Fragoso is a second-year Computer Science student at Foothill. She graduated from Silver Creek High School. In her free time, she likes to draw.

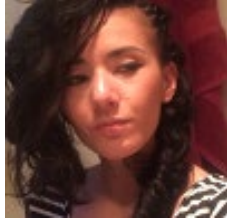

Brandon Gomez

Brandon is a second-year student at Foothill College studying Computer Engineering. He is planning on transferring to a UC/CSU to finish his degree and has been with the SLI STEM Impact Team since it was created in 2021. Some activities he enjoys outside of the academic field include playing basketball, watching sports, exploring the outdoors, and adding to his sneaker collection.

Leo Kim

Leo is a first-year Computer Science major at Foothill College. Born and raised in South Korea, he is excited to start the new chapter of his life in the United States. Before attending Foothill, Leo interned at Samsung, where he assisted company executives with business research and decision making. He also worked for various non-profit organizations at the intersection of public education and competitive debate. His recent academic interests center around digital privacy and tech policy. During his free time, he enjoys re-watching his favorite dramas and movies, exploring delicious foods, or swimming.

Marisela Landaverde

Hope you are doing well! I just upload my picture and this is my little bio: Hey everyone! I am a third-year Civil Engineering major here at Foothill College. Some of the programs that I have been part of during these three years are EOPS, PUENTE, Pass the Torch, and SLI. A quick fact about myself is that I came to this country when I was 16 years old from El Salvador, and now I am a first-generation

Latina in STEM.

Yash Gandhi

Yash is a college re-entry student working towards a business administration degree. Outside of school, he's an active real estate advisor and co-founder of a wellness-centered company focusing on accessibility to movement. He's passionate about mental, physical, and spiritual well-being. Yash loves chanting, cycling, and reading Srimad Bhagavatam. He enjoys spending time with family and

friends, following Formula 1 and go-karting.

Drake Jha

Drake is a second-year Computer Science Major. He has been a participant in the SLI ever since he started studying at Foothill in August of 2020, when he took a summer-introductory course in Python. Shortly after that, he joined the Tech Core Cohort (Now Pre-STEM) where he has helped in a couple of leadership roles, such as being a helper in a youth STEM workshop and hosting tutoring sessions for people in the cohort. Drake also interns part-time at the SLAC

National Accelerator Facility, where he works on software-related tasks concerning SLAC's linear accelerator.

Alexandra Sugatan

My name is Alexandra "AJ" Sugatan (she/her/hers), and I am a second-year computer science major. As an advocate for educational equity and social and economic justice, I hope to make significant changes to benefit more students at both Foothill College and the local community.

Lily Swedlow

Lily is a second-year Math Major. In the middle of the pandemic, after two previous attempts at different colleges, she began studying at Foothill. Her most successful college career yet began with SLI's Techcore Cohort which she joined shortly after she started at Foothill. From there, Lily has worked with SLI through various roles including being a Peer Mentor/TA/Admin Assistant for the Techcore

Summer Institute 2021, a member of the new SLI STEM Impact Team, and SLI's budding Social Media Specialist. Lily is also a Math peer tutor through a couple of different programs.

When she's not busy tutoring or working on bringing SLI to Social Media, she loves practicing her web & graphic design skills. She primarily enjoys spending time with her cat, Dozer, or her very energetic puppy, Jack.

Michael Xu

bio to come

Danielle Vintayen

Danielle is a first-year Biology student at Foothill College. She plans to transfer to a UC or a private school as a science major. She has been working as an administrative assistant with SLI since Fall 2021. Danielle graduated from James Logan High School. In her free time, she enjoys baking and reading.
