Incorporating Active Learning Strategies into Your Online Teaching Environment - webinar
Incorporate active learning strategies into your online teaching environment to increase retention of information. But facilitating an online course involves more than just teaching, building community is also essential. Learn about teaching strategies and techniques to create an online learning environment that actively engages their learners and creates a sense of community.
Facilitator: Judy Baker, Dean
Thursday April 26, 2012 from 12:00 to 1:30 pm
Altos Conference Room

In Search of Student Engagement
This interactive workshop will focus on the mercurial--and often confounding--pursuit of student engagement, with a particular emphasis on intrinsic motivation and learner autonomy as windows to engagement. Among the issues addressed in this colloquy will be:
- What ingredients might promote intrinsic motivation?
- How do classroom power dynamics influence learner engagement?
- What do learners say about engagement?
Facilitator: Robert Hartwell
Wednesday May 2, 2012 from 12:00 to 1:00 pm
KCI - Room 4002

Adobe Day at KCI
Learn from the pros. Adobe engineers are coming to Foothill College to teach students, faculty, and the community the latest and greatest tips and techniques for using Adobe applications.
Saturday, May 5, 2012 from 10:00 am to 3:00 pm

Getting Results: Professional Development Course for Community College Educators
Modules http://www.league.org/gettingresults/web/

Whether you’re a new or experienced teacher, you have a chance to make an impact on the future of the country. How can you be as effective as possible? This multimedia resource for community college faculty will challenge your previous thinking about teaching and learning and give you the basic tools for effective classroom practice. The key theme of the course is to encourage you to focus on what the students will do and take responsibility for their success. Teachers know their content and they know how to explain. These are valuable skills. But teachers have to become experts at tapping into their students' knowledge base and how they learn.
