

WORKSHOP SERIES

2018 WINTER PD DAY

Friday, January 26

Lunch
provided!

Workshop 1: Getting Started with Service Learning in the Toyon Room from 9AM - 1PM

This workshop will introduce you to all you need to know to integrate Community Service Learning as part of your course. We will start with the conceptual level of how to integrate the work deeply into your course objectives, and then go to ideas for assignments, and the nuts and bolts of developing partnerships that will work for your class.

Workshop 2: Using Your Own Videos to Encourage Student Engagement,
11AM-1PM, Hearthside Lounge

Hear fellow staff and faculty members discuss how they create and use videos to humanize the online experience and encourage students to become active participants at Foothill and in their online courses. Panelists will share how they create videos, the technology they use, how hard or easy it was, and how students responded to the videos. Participants will have the opportunity to sign up for a mini follow-up course in Canvas where they will learn how to create their own video. Upon successful completion of the optional mini-course, they will receive one additional hour of PGA and a badge that they can share on their social media sites. This session is inclusive of classified staff!

Maker Space Tours Available:

Come experience the KCI Underground MakerSpace, where you and your students can explore the process of Making. Regardless of the subject, there are many curricular connections students and teachers can make using the MakerSpace. The KCI Underground MakerSpace is open to staff, faculty, students, and community members and we hope to build a community of makers at Foothill.
