Minutes recorded by C. Nuñez.

1. Minutes: Minutes for November 15, 2005 unavailable for review at this time.

2. General Education Review – 2nd Reading/Action
The following courses were reviewed as action items:
   a) CHLD 11 - Members reviewed and approved this course for Area VI. Seems there might be two versions of the outline; Nunez will verify. (M/S/C Treanor Barker/Townes & Francisco, 1 opposed)
   b) PHOT 8 - Members reviewed and approved this course for Area I (M/S/C Feig/Townes) and Area VI (M/S/C Feig/Townes).
   c) MATH 44 - Members reviewed and approved this course for Area V (M/S/C Gillette/ Francisco).
   d) ENGL 48A, B & C - Members reviewed and approved these courses for Area VI (M/S/C Francisco/Feig).

3. General Education Review – 1st Reading
The following courses were reviewed for addition to the GE Requirement List:
   a) F A 1 - Members asked what discipline(s) this course should list.
   Committee suggested that the author review this section of the outline. The committee felt strongly that the best fit for the course would be in Area I. Also suggested that the methods/evaluation section be beefed up. Even though the course has been requested for addition to every GE area, the members suggested to the author to evaluate and possibly limit the number of areas to which they are applying.
   b) PHOT 5 - Ron Herman explained briefly the difference between PHOT 1 and this course as the lack of negative developing. Since the last meeting a lab component has been added and the unit value changed to 4 units.
c) DRAM 5B - Tom Gough made himself available to the committee for questions. The outline needed some corrections; statement of cross-listed courses, and prereq needed updating. The committee also suggested that the outline be fleshed out more in keeping with the rationale.

d) CRLP 81, 82, 83, 84, 85, 86, 87 - Jerry Cellilo gave a brief introduction to this series of courses that are preparation for various careers. Some members were concerned regarding the breadth of these courses. Cellilo liken them to the physical education classes that are currently in the Lifelong Understanding area.

e) SPED 61 - The committee was at a loss to understand how this course would fall under the American Culture and Communities area. Bea Cashmore shared with the committee her expertise in this area and expanded of the committee's understanding of disability as a culture.
